## Solutions . . .

### . . . for diamondback™ urethane classifier shoes

Diamondback Urethane Classifier Shoes can help control many of the problems common to bulk aggregate handlers. Designed to fit specific classifier models and sizes, Diamondback offers many advantages over rubber, plastic and Ni-Hard shoes. Diamondback is known to outwear even Ni-Hard by a margin of 2.5 times to 1. In addition to weighing only 1/7 as much as Ni-Hard, Diamondback is flexible, eliminating the need for separate right and left shoes.
