

SOLUTIONS

Solutions... ...for impact pads

-  Impact Pads are used at belt conveyor discharge areas to slow product flow. Impact pads reduce wear problems at 90° discharge areas as well as downstream.
-  The Corrugated/Sawtooth Pad has been the industry standard for the past 20+ years and bp continues to feature the corrugated pad.
-  Dimpled Pad design allows the product to lodge between the dimples. Product impacting product reduces the overall wear to the impact pad.
